

PANDOC AND MARKDOWN IN 5 MINUTES

LIGHTNING TALK @ *Open Source Open Mic*

Dirk Eddebuettel

26 October 2017

OUTLINE

- Pandoc
- Markdoc
- Text *processing*

PANDOC

- **The** Swiss army knife for text conversion
- From anything to anything
- Rather widely used
- Well documented, many options
- Written in Haskell (!!) by head of UC Berkeley philosophy dept (!!)
- Very scriptable in the Unix tradition; extensible via **pandoc-filters**

Source: Pandoc website

MARKDOWN

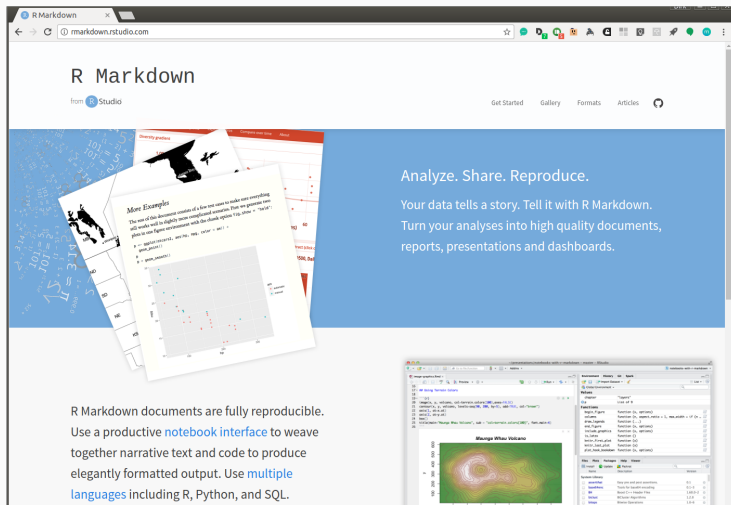

- Invented by John Gruber of *Daring Fireball*
- Very widely used as an **easy** markup language
- It is everywhere now (GitHub, StackOverflow, ...)
- Might get standardised (commonmark, GitHub-flavored, ...)
- Fits with Pandoc like peanut butter and jelly

INTEGRATION

- Integration with R via [rmarkdown package](#)
- Extensive [documentation by RStudio](#)
- Integration with R (and Python, SQL, ...) code chunks
- Dynamic and computable documents that auto-update

The image shows a browser window displaying the R Markdown website. The page title is "R Markdown" and it includes navigation links for "Get Started", "Gallery", "Formats", and "Articles". Below the navigation is a large blue banner with the text "Analyze. Share. Reproduce." and "Your data tells a story. Tell it with R Markdown. Turn your analyses into high quality documents, reports, presentations and dashboards." To the left of the banner is a collage of R Markdown documents, including a scatter plot and a map. Below the banner is a screenshot of a R Markdown document showing code, a plot, and a map.

R Markdown documents are fully reproducible. Use a productive [notebook interface](#) to weave together narrative text and code to produce elegantly formatted output. Use [multiple languages](#) including R, Python, and SQL.

DEMO

OUR 'TEMPLATE'

```
emacs@brad
File Edit Options Buffers Tools Markdown Text Polymode Help
---
title: "Daily Randomness"
subtitle: "Don't Take It Seriously"
author: "Department of Random Generators"
date: "`r Sys.Date()`"
output:
  tint::tintPdf:
    latex_engine: pdflatex
---

## Daily Report

`r tint::margin_note("Updated automatically")`

```{r fig-nocap-margin-first, fig.width=6, fig.height=4, cache=TRUE, echo=FALSE}
suppressMessages(library(xts))
n <- 365
pnl <- xts(100 + cumsum(rnorm(n)), order.by=Sys.Date() + (-n+1):0)
plot(pnl,
 main=paste(iffelse(tail(pnl,1)>100,"Great","Shitty"), "Results"),
 col=iffelse(tail(pnl,1)>100,"darkgreen", "darkred"))
````

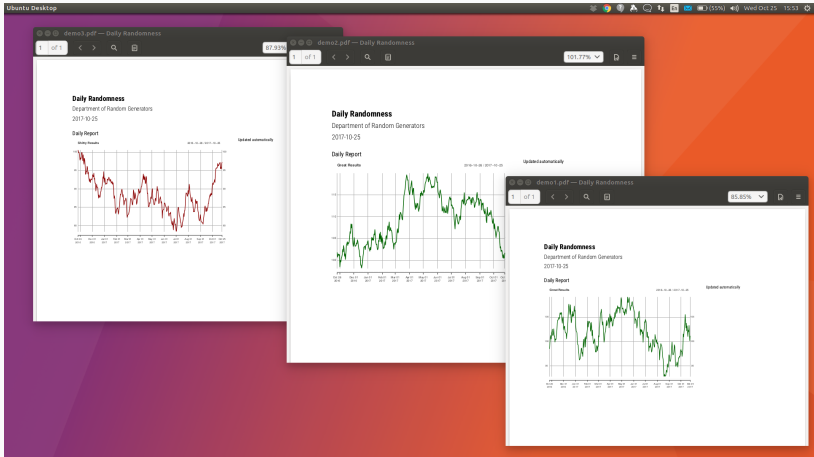

-:--- demo.Rmd All of 585 L1 (Markdown company EditorConfig PM-Rmd)
```

OUR 'DEPLOYMENT'

```
#!/bin/sh
```

```
for i in 1 2 3; do
  rmdfile="demo${i}.Rmd"
  pdffile="demo${i}.pdf"
  echo ${rmdfile}
  cp -vax demo.Rmd ${rmdfile}
  Rscript -e 'rmarkdown::render("'"${rmdfile}"')'
  test -f ${pdffile} && xdg-open ${pdffile}
done
```

RESULT

Pandoc

- rocks as very versatile to/from anything converter
- highly scriptable, widely available

Markdown

- has won the markup languages fight
- is literally everywhere, dialects exists though

RMarkdown

- highly customizable
- highly expressive
